PROFESSIONAL SUMMARY

Software Engineer with **3 years** of experience building scalable full-stack web applications using **TypeScript**, **JavaScript**, **React.js**, **Next.js**, **Node.js**, **NestJS**, **PostgreSQL**, and **MongoDB**. Experienced in developing AI-powered applications using **OpenAI**, **Claude AI**, and Large Language Models (LLMs), while building secure **RESTful APIs**, microservices, authentication systems, and payment gateway integrations. Proficient in **Redis**, **AWS**, and **Docker**, with a strong focus on performance optimization, scalable architecture, clean code, and delivering production-ready solutions in Agile environments.

EXPERIENCE

Full Stack Developer

Sep 2025 – Present

Codefork Technologies Private Limited – SDLC Corp, Noida

- Engineered AI-powered full-stack applications, including astrology platforms, job portals, and gaming solutions using **Next.js**, **NestJS**, **TypeScript**, and **MongoDB**, delivering scalable, secure, and high-performance user experiences.
- Architected scalable microservice-based backend services and integrated **OpenAI** and **Claude AI** APIs to enable AI chat, workflow automation, intelligent content generation, real-time decision-making, and enterprise-grade AI solutions.
- Implemented secure subscription and one-time payment gateway integrations through REST APIs with webhook handling, **JWT/OAuth2** authentication, Redis caching, and optimized database queries to ensure reliable and fault-tolerant transaction processing.
- Partnered with product managers, designers, and QA teams in an Agile environment to translate business requirements into scalable technical solutions while participating in the complete SDLC.
- Improved code quality by writing unit and integration tests, conducting code reviews, and optimizing application performance, resulting in more maintainable and reliable production systems.

Associate Software Developer

Jan 2024 – Aug 2025

Impactsure Technologies Private Limited, Mumbai

- Engineered AI-driven banking document generation solutions using **NestJS**, managing over **320+ configurations** and **75+ dynamic parameters**, reducing document processing time by **80%** and improving document accuracy by **75%**.
- Developed secure microservices incorporated with **MongoDB**, OCR engines, and AI services to automate banking document processing, validation, and workflow management.
- Applied secure authentication and authorization using **JWT**, **OAuth2**, Redis caching, centralized logging, and optimized REST APIs to enhance application security and backend performance.
- Created responsive enterprise web applications using **Next.js**, **TypeScript**, and **JavaScript**, ensuring seamless integration between frontend and backend services.
- Partnered with business stakeholders and cross-functional teams throughout the SDLC to digitize end-to-end banking document workflows, improving operational efficiency, scalability, and regulatory compliance.

Full Stack Developer Intern

Oct 2023 – Jan 2024

RABLIK Private Limited, Bhopal

- Developed responsive and interactive web applications using **React.js**, **HTML**, **CSS**, and **JavaScript**, creating reusable components, implementing dynamic user interfaces, and optimizing application performance to deliver a seamless experience across desktops, tablets, and mobile devices.
- Integrated frontend components with backend **REST APIs**, enabling seamless data exchange and improving overall application functionality and user experience.
- Implemented dynamic UI features, resolved bugs, optimized page performance, and maintained clean, reusable, and well-structured code following software development best practices.
- Collaborated with senior developers using **Git** for version control, participated in code reviews, and contributed to feature development throughout the software development lifecycle (SDLC).

PROJECTS

- PrepX – AI Mock Interview Platform

[Next.js, NestJS, TypeScript, MongoDB, Claude AI]

 - Built an AI-powered mock interview platform using Claude AI and LLM APIs featuring voice-based interviews, dynamic question generation, AI evaluation, instant feedback, scoring, progress tracking, leaderboards, and interview analytics.
 - Architected scalable backend APIs with JWT authentication, interview history management, and AI response evaluation to deliver an interactive interview experience.
 - Enforced responsive dashboards with real-time analytics, personalized interview reports, and role-based access control to improve user engagement and learning outcomes.

- AI Document Verification System

[Next.js, NestJS, PostgreSQL, OCR, OpenAI]

 - Built an AI-powered document verification platform supporting OCR-based text extraction, fraud detection, secure authentication, systematized validation, and verification reporting.
 - Implemented intelligent verification workflows using OCR, AI models, secure backend services, and PostgreSQL to validate document authenticity.
 - Leveraged OpenAI APIs for intelligent document analysis, mechanized field extraction, confidence scoring, and verification report generation while ensuring secure document processing.

SKILLS

- Languages:** TypeScript, JavaScript, Java, Python
- Frontend & Backend:** React.js, Next.js, Node.js, NestJS, Express.js, HTML5, CSS3
- Databases & ORM:** PostgreSQL, MongoDB, MySQL, SQL Server, Prisma, TypeORM
- Backend Technologies:** REST APIs, Microservices, JWT, OAuth2, WebSockets, Redis
- AI & LLM:** OpenAI API, Claude AI, Generative AI, AI Agents, OCR, NLP, Google Vision API
- Cloud & DevOps:** AWS, Docker, Linux, CI/CD
- Tools:** Git, GitHub, Postman

CERTIFICATIONS

- Full Stack Development** – SCA Live

Jul 2023
- Computer Networks** – IIT Kharagpur

Apr 2023
- Generative AI** – Udemy

Jan 2026
- HTML5 & CSS3** – Udemy

Dec 2021

EDUCATION

- Master of Technology (Computer Science)

Sagar Institute of Research and Technology (RGPV), Bhopal

Sep 2024 – Jun 2026
CGPA: 8.20
- Bachelor of Technology (Computer Science)

IES College of Technology (RGPV), Bhopal

Sep 2020 – Jun 2024
CGPA: 8.26
